## DIMA wood drill bits: **Precise and fast**

materials. Characterised by technical features that offer advantages both in the application (convenience, speed, durability) and in the result (precise, clean drilled hole, tear-free).

### Brad point drill bits

For dowel and screw holes.

The centring tip and the two raised pre-cutting spurs are CBN-ground. This enables accurate positioning and dimensionally correct drilled holes.

The special flute shape with double guiding section prevents chips getting jammed and ensures speedy chip removal.

> **precise, tear-free drilled holes**

## Large/deep drilled holes

### DIMA

#### Auger bits

Market standard for the highest quality: with self-feeding threaded tip, pre-cutting spur and main spur. For high delivery volume and rapid drilling rate: flutes with Lewis shape.

> **dimensionally correct**

**drilled holes**

> **effortless drilling progress**

Extremely convenient drilling for carpenters, roofers and plumbers. These drill bits make it easier to drill large or deep holes in beams and wooden walls. The self-feeding drill bit tip and the new tip geometry make drilling easier, faster and more precise

## SELF CUT

Universal use in wood

### Fast drilling thanks to self-centring threaded point

- > Two side spurs
- > 1/4" hexagonal shank
- > Clean and safe drilling action

## DIMA Flat drill bit SelfCut

### Recommended for working on:

Medium-hard and soft wood, chipboard and fibre boards as well as light building materials such as plasterboard

### User instructions:

For use in all chuck holders and toolholders; easy guidance, particularly with hand-held drills; easy re-sharpening

Flat drill bit with self-feeding threaded point and two side spurs; manufactured to own factory standards from specially toughened steel; insertion end with 1/4" hexagonal shank manufactured to DIN 3126-E6.3
